## Project Title: Evolution of Hip Hop

I want to make a site that has multiple pages and leads you through the journey of time. I think I want there to be side bar navigation that tabs out but also have the ability to click through on a certain path. There are a lot of different sections to this topic that will help me to separate pages and there are a ton of images that I can incorporate.

- Cover Page - Image

- Overview

- 1970s

- 1980s

- 1990s

- 2000s

- Present Day
